## INSIGHT COMPLIANCE

### Global non-life (P&C) insurance regulations and taxes at a glance

Insight Compliance supplies insurance professionals with essential regulatory and tax compliance information for conducting non-life insurance business in over 170 markets across the globe.

Information is available by line of business, with all key subclasses covered, and regulatory topics range from taxes and compulsory insurances to non-admitted business and policy conditions. All data is delivered in a timely and accessible way through Axco Insight, the new, flexible information delivery platform from Axco that allows subscribers to customise and filter data and view information by line of business, market or topic.

Insight Compliance creates time-saving efficiencies by providing a single, reliable source of compliance information. All data is prepared and maintained by an in-house team of research analysts and supported by the intelligence secured by Axco industry specialists visiting local supervisors, insurers, reinsurers and brokers in each of the markets that Axco covers.

#### Key Benefits

1. Supplies business-critical information on key regulatory requirements for markets worldwide
2. Delivered through Axco Insight, with topics compiled from clients' most frequently asked compliance questions
3. Offers a comprehensive, customisable compliance overview of multiple markets, with the facility to view line-of-business-specific regulation.

# 04 INSIGHT COMPLIANCE

## Business-critical compliance data

Insight Compliance offers an overview of the key regulatory and tax compliance conditions applicable to conducting insurance business in over 170 markets. It delivers essential information on conducting non-admitted business, the taxes and charges payable, and whether there are any local compulsory classes of insurance.

Axco's data can help subscribers to keep up to date with the requirements of the markets in which they operate and offer an insight into markets they may be looking to enter.

Insight Compliance delivers business-critical information on key regulatory and compliance topics, including:

- taxes, tariffs and charges split by insured, insurer and reinsurer
- compulsory classes
- non-admitted positions
- premium currency, collection and reserves
- policy language and currency
- local broker requirements

## A single, reliable information resource

By bringing together the answers to insurance professionals' most frequently asked compliance questions, Insight Compliance offers a single point of reference for information on local insurance regulatory requirements across the globe. It eliminates the need to research, sort, translate and verify multiple sources of regulatory information from source languages, and Axco aims to provide only the most accurate, relevant and up-to-date insurance intelligence available.

Regular market visits and frequent updates ensure that Insight Compliance shows the most current regulatory and tax information available, and subscribers can be confident of the reliability of Axco reporting.

## Lines of business covered

Accident Assistance Aviation Business interruption Clinical trials Commercial and industrial property	Construction and engineering Credit Directors' & Officers' Liability Employers' Liability Environmental liability General liability	Goods in transit Householder/homeowner property Legal expenses Marine Miscellaneous financial loss Motor	Oil and energy Product liability Professional liability Sickness Surety
----------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------

## Simple, accessible and flexible delivery

All Insight Compliance information is delivered through Axco Insight, the new, flexible information delivery platform from Axco.

Axco Insight allows users to choose both the information most relevant to them and the way in which they view it. Multiple classes and subclasses of business, topics, markets and regions can be viewed simultaneously, and users can easily refine the volume of data they wish to view and amend their data selections at any point.

Concise and focused data applicable to a particular line of business gives users the information relevant to their individual regulatory requirements, whilst the Insight Compliance format maintains consistency and helps subscribers to quickly find information and compare compliance data across multiple lines of business and markets.

Information can then be sorted by market, line of business or topic, and customised view preferences can be altered by switching axes and columns.

### Features of Insight Compliance

- Access through the Axco Portal
- Compare regulatory information side by side for multiple territories and multiple lines of business
- View general information on land size, climate, population and language for each territory covered
- Choose from among major lines of business or a class tree of sub-classes
- Follow a link to the full Axco Insurance Market Report for greater market detail
- Export data to Excel
